21-10-2019, 17:16 The v1.3 Far Cry patch can be downloaded here: All versions to v1.3. damage can be disabled by g_vehicleBulletDamage cvar: 0 = no bullet damage (default), 1 = bullet damage; this works only in MP.. Added quicksave support for single player (still in process). Win 98/ME does not support F12 screenshot capture 21-10-2019, 17:16 Win 98/ME does not support F12 screenshot capture Many thanks for letting me know. Obviously this is not ideal for quick-action - although I did get some cool screenshots earlier, when I realised my F12 was working.Q: Why is this regex replacing the first character with a backslash? I am capturing a group of strings from a string with 3 elements: subject, location, city. The regex that I used is: (subject)(location)(city) I am then splitting the string into individual strings: subject, location, city The split function replaces the "" with "". Why is this? My strings are being processed into one long string, so why is it converting \ to \? A: In your example, subject is (probably) a backslash, so you need to make the first backslash your delimiter: subject(location)(city) ^^^^^^ ^^^^ ^^^^ EDIT: Here is the regex (using c++ syntax for ease of readability): subject[\t]*location[\t]*city EDIT: Here is a live demo (and test), which shows that the ""s are being replaced by "": #include #include #include #include int main() { std::string input = "subject test "); // before splitting std::stringstream output; std::regex subject(R"(subject)(location)(city)"); std::smatch sm; // std::cout 6d1f23a050
