What's New in the Kemo Data Security Lite?

-Kemo Data Security Lite- is the ultimate security solution to your personal and mission critical data. If you want to keep your valuable data secured and protected from theft, prevent unauthorized access and want to conceal your confidential information from stranger eyes, KDS Lite is the perfect solution. -With KDS Lite you can secure all your files/folders in one output encrypted file, using multiple levels of the thoroughly tested Advanced Encryption Standard (AES) that is used by the U.S. Government organizations and security experts worldwide, even your email can be encrypted using KDS Lite. -KDS Lite includes virtual Data Safe which is the most secure place to keep your personal files/folders to ensure your privacy. -Kemo Data Security Lite also provides you with the possibility to perform hard drive total cleansing and permanently delete your personal files/folders beyond recovery. Features of Kemo Data Security Lite:- -Include multiple levels of Advanced Encryption Standard (AES) for data security: AES is a publicly and extensively examined encryption standard. It is widely used by government organizations, financial institutions, and major vendors for high-grade data protection. As a result, AES is one of the widely accepted cryptographic algorithms in the world. -All-In-one File Encryption: AES is advanced encryption standard used to securely encrypt sensitive information, and is capable of providing strong security for files and folders. With KDS Lite, you can protect your data from unauthorized access, even while the data remains unencrypted. AES encryption algorithm provides maximum protection in terms of both key management and data storage, so your information can be accessed by you only. AES encryption algorithm also provides maximized security with regard to data storage by ensuring only the authorized user can access the

information. -Cookie Blocking: with KDS Lite, you can prevent your internet browser from saving or storing cookies that contain your keystrokes, which is a nice security measure. This will protect your Internet surfing activities from prying eyes. -Selective Path Lock: with KDS Lite, you can protect your sensitive information from physical theft or loss by locking the maximum number of files and folders at the same time. You can find this feature in the software. -Folders Encryption: with this feature, you can control how your entire file system is encrypted. The feature comes handy if you have files/folders that are encrypted with AES, but you would like to have access to some of them. With this feature,

System Requirements:

Microsoft Windows 7 - 64bit or higher, with 4GB RAM minimum 4 GB of RAM is recommended Multi-core processor (4 core processor recommended) Graphics Card (256MB OpenGL 2.1) Please note that graphics card and drivers are not tested. It is recommended that you have a DirectX 9 graphics card to play this game. CONTENTS - Game Preview - Game play (Introduction) - Intro Video - Game Overview - Key Features
