Portable Chrome Password Remover Download With Full Crack Portable Chrome Password Remover Product Key is a very straightforward utility that gathers all of the logins stored inside your Chrome browser, enabling you to export them locally or to remove them altogether. It is the to-go version of Chrome Password Remover, sporting the exact feature set as the latter, with the upper advantage of being a portable application, which means it won't write to the registry when launched on a machine. What stands out about this program is that it can reveal the list of passwords present inside a variety of Chrome profiles, thereby for all users present on the system. By default, it detects the profiles of the current user, but allows you to browse to other Chrome App Data folders, corresponding to a different user account. The interface is quite intuitive and user-friendly, with most of the space dedicated to the password list, which is retrieved as soon as you press the 'Show Passwords' button. The username and passwords are displayed alongside the website they correspond to, allowing you to remove each record individually or all of them at a time. However, the latter option takes longer to complete, especially if the list of passwords is considerably long. Before you actually remove any of the logins, you might want to backup the information, which can be done by exporting the list (to HTML format) using a dedicated button. All in all, Portable Chrome Password Remover benefits users who are looking for a quick method of erasing the passwords stored inside Chrome, coming across as a good addition to your collection of privacy tools.
