**very addictive. LA CABINETTE adds a whole new dimension to the game by having a time limit for the player. The presence is always in the same place: in the last room. You start with 15 minutes to find all the cards hidden in the house and escape. You're going to die. The ending screen will explain how it happened (if you escape or not). It can be very difficult or easy, depending on what you have done in the game. LA CABINETTE is both a horror game and an abstract game. It is a psychological exploration of the mind that combines a lot of concepts such as environmental design, spatial perception, perception of time and the senses, as well as several elements inspired by horror and American genre cinema. The combination of the above creates an atmosphere of uneasiness and panic, almost always contained and understood by the player. Key Features: - One player story. - Realistic and interactive 3D environments. - Realistic sound effects and soundtrack. - A panoramic view on the player area, allowing multiple options of play. - GamePad support (Touchpad on Game Boy Advance, Xbox 360, PS3, Wii U, PlayStation Vita). Welcome to the tense and terrifying world of LA CABINETTE, the game where one player must avoid a dangerous presence lurking in the house and find all the cards hidden in the rooms and escape from the real-time horror story.
