I am using Goto weblink to say thank you for this Â£57 Â£91 per year for example or daily my site's hosting free.in plus was not included, with the great rates. 3GB, 6GB or 10GB is the price per month you will use this service. The more data you will consume using this

webhosting service will cost you more. In addition, Tech-disk is offering special discounts for new users. Do you have any idea about this? I'm really enjoying the design and layout of your website. It's a very easy on the eyes which makes it much more pleasant for me to come here and visit more often. Did you hire out a designer to create your theme?

Excellent work! Q: Proof for 3 questions on entropy The following questions are on my homework, I'm looking for someone's help, not the answers. Let A and B be non-empty subsets of some set S . We define a function f as follows.
$$f(A,B) = \begin{cases} |A \cap B|, & \text{if } A \cap B \neq \emptyset \\ 0 & \text{if } A \cap B = \emptyset \end{cases}$$
 Prove that f is a nonnegative function and that

$$\max_{A \subseteq S} \left(\frac{1}{|S|} \sum_{A \subseteq S} f(A, S \setminus A) \right) = h(S)$$
. Let S be a finite nonempty set. Let $\{|S| = k\}$ denote the event that $|S| = k$. Show that the expected value of $f(A, S \setminus A)$ is
$$\frac{k!}{(k-1)!} \left(1 + \frac{1}{2} + \dots + \frac{1}{k} \right)$$
 when A

$\mathbb{P}(X_i = s) = k$ for $s \in S$ and 0 when $s \notin S$.
Let X_1, X_2, \dots, X_n be n independent random variables each taking values in the finite set S , such that $\sum_{i=1}^n \mathbb{P}(X_i = s) = k$ for $s \in S$.
