What are Strata's They say? "The soul compels me." Strata, is a mental puzzle game that turns the classic Rubiks cube into a 3 dimensional puzzle. Its a complex and highly effective match three style puzzle that has a surprisingly easy learning curve. In Strata you must manipulate the cube to match the pattern of the puzzle. Each puzzle has its own objectives and unique dynamics, and challenge; you will be continually challenged with increasing the difficulty of the puzzles. As you complete more puzzles, you unlock new levels and challenging modes. Strata uses a variety of creative puzzle mechanics and a rich assortment of cube faces. Each face of the cube could be set to any of its eight possible orientations. Once set, the faces are dynamic and can change throughout the game, making the puzzles more difficult and requiring the player to come up with new strategies. Features: * Multiple game modes including: 24 levels, 4 difficulties, 3 unique cube styles, 8 cube faces * Xbox Live Achievements * iCloud Save and Restore * iCloud Support for leaderboards and achievements * iCloud Support for Achievements: If you are interested in playing to achieve the highest score, you can use iCloud to view leaderboards and achievements About the Game Creators: The development of Strata took place during the summer of 2013. We had four months of design, 12 months of development and 4 months of testing and we have finally released the finished game. The idea for Strata came during a serendipitous conversation with a friend. We were lamenting that there was not enough apps for advanced match-three and puzzle games. There was a void in the Apple App Store that we wanted to fill and we soon realized that it was a market segment that would fit perfectly with the spirit of SimonGames. What's New in Version 1.0: * Improved UI * Improved user experience * Improved and optimized game play What's New in Version 1.1: * iCloud: Now you can have your high scores and leaderboards moved from one iOS device to another iOS device. Previously you would have to load the game from scratch if you wanted to test your skills on another device. With iCloud you can now play to your absolute high scores on the device that matters the most. * Controller Support: We now support the Xbox 360 pad and it works brilliantly. All feedback is appreciated; we'd love to know what you thought about the game. Please provide feedback on the Apple iTunes

This is a stylized platform beat em up with RPG elements. There are no weapons and the only way to fight is to create your own beats using the unique on-board sequencer. Your abilities are your beat making skills. Every song is its own player so you can choose to make a difficulty curve or just enjoy the journey. If you would like to use this music in your own games or apps we ask you to contact us first and we will try to help you. We do NOT use these audio files to advertise or link to anything. Comments and ratings for BeattheMIDlverse, as well as the entire Beat Blast family of apps, can be left at the Market link below. Please ask the author of the app if the app has any bugs or issues that need to be resolved. From the very beginning, we wanted to create a game that would take advantage of mobile hardware, as we were certain such a system could be mastered. Be the first to download and compete against your friends! Beat the MIDlverse, a virus-ridden technical realm where music takes physical form. The MIDlverse is full of abilities that can be combined to support hundreds of different styles of play. At the heart of it all is your song; a looping beat that can be tweaked at any time to completely change the rhythm of the gameplay. No two runs are the same and each run has its own soundtrack. Gameplay: No two runs are the same and each run has its own soundtrack. At the end of each level, players are ranked by how many runs they have completed and their performance is scored accordingly. The more runs you complete, the higher your score. At a certain point, the level will be completed. As an added bonus, players will be able to beat up on the level designer, Cecil, in the battle of the MIDlverse. Challenge your friends with the newly added high score and speedrun competitions. CREATE YOUR OWN MIDI RULES! You decide the difficulty of each level. It is up to you whether you want to set high or low scores, or random scores. SHADOWS AND SOUND! The music you make becomes your abilities as you battle the MIDlverse. WHAT IS BATTLE BEAT BLAST? Battle Beat Blast (BBB) is a beat em up with RPG elements. It is a great combination of the fundamentals of RPG and c9d1549cdd
