I'm not developing the app on Xcode. I have a CLI(command line interface) and need to compile the app on CLI and then add it to Cydia. And the problem is that although I added my compiled.ipa to Cydia, and changed the version number and the application ID on Cydia, it's still saying "This app is incompatible with the version of the device" (for example it says iPhone 4s/iPhone 5/iPhone 5c). What's the problem? I've installed old version of Xcode (4.2) and SDK (4.2). Can anyone help me? A: I've installed old version of Xcode (4.2) and SDK (4.2). No, you cannot do that: Xcode 4.2 and iOS SDK 4.2 are not compatible with iOS SDK 4.3 and devices supporting iOS SDK 4.3. So, you must have Xcode 5.0 / iOS SDK 6.0 or later. As I understand from the question, you have not a Cydia install. You have an

archive ready to upload to Cydia, but it only has the old SDKs version. I suggest you, as you seems to have the informations, to re-create the archive. Q: Regular expression matching a string containing at least one zero or more With the standard input() function, I tried to find at least one digit in a string : #!/usr/bin/python

```
import re
s = raw_input('teststring: ')
if re.search('0\d*', s) is not None:
    print 'yep, found!'
```

The synthesis of the corresponding propargyl alcohols by intramolecular transfer hydrogenation of oxocarbenium ions bearing aldehyde or ketone functions, and subsequent reactions leading to biphenyl derivatives is a long-standing goal. By a simple one-pot process, we have now synthesized a series of fused-dibenzo[a,c]phenazines, by condensation of the monobromodibenzo[a,c]phenazine-3,6-dione with the aldehyde or ketone moiety. The presence of the oxocarbenium ion promoted intramolecular aldehyde or ketone addition to the aromatic C-H bond. We

report here the first example of an intramolecular transfer hydrogenation of oxocarbenium ions bearing aldehyde or ketone function, leading to an efficient synthesis of the corresponding propargyl alcohol.Q: NPN BJT SCR not detecting when triggered I'm having a problem with an NPN SCR, I'm not able to get it work. I am trying to use it to detect a given heater resistances. I tested with a 12V heater voltage (max) and the BJT works fine. When I try to replace the heater 6d1f23a050
