A new world.A new game.A new hero. Sonic is just a normal hedgehog. He has always lived peacefully with Sonic Boom until one day, a villain named Silver the Hedgehog appeared. To retrieve his homeland, Sonic must travel to the Moon and defeat Silver. In his journey, he'll meet a mysterious girl named Shadow. Together, they will beat Silver and reclaim the world. Aim for the highest level! Sonic is a fast-paced, arcade-style game. You can control Sonic to run, jump, and perform special moves on your journey to collect the red gems to defeat Silver. A shadow cast by the light. Shadow is a real-time strategy game. The story of Shadow will be revealed over the course of the game. Your decisions and actions will affect the story and help shape Shadow's destiny. Escape the light. It is a puzzle game. In order to escape the light, you'll need to solve puzzles and avoid traps. A unique game. Some players who've tried the online game service may say that the game doesn't look like a real game. But, if you've been playing Sonic the Hedgehog, you'll know that it's all about speed, and that quality is not important. About the game Have fun by playing as Sonic, Tails, and Knuckles. In the game, you must defeat the evil Silver the Hedgehog, who kidnapped them. You'll encounter objects like bombs and traps along the way to the boss. In the game, you can use special moves and power-ups to help in battle. ****Website **Facebook **Weibo **Contact Us**

Association of cyclin G3 with the tumor suppressor protein PML. The PML protein (also known as promyelocytic leukemia protein) is a nuclear protein and transcriptional repressor involved in a wide range of cellular processes. Through its ability to interact with proteins that participate in chromosomal remodeling, PML may function as a tumor suppressor. We report here a human cyclin G3

What's new:

opens a portal for innovation AI CG Generation Engine Author: Henrik Folsgaard, COO Director The venerable Studio 300 (S300) Image Engine, often considered a driving force in CG for the last 20 years, has recently become professional sister company of CADA, as part of a larger expansion and restructuring that will result in more ambitious technology development and production. The new Studio 300 Image Engine will research and apply new technologies in the CG world. Image Engine is also opening up its CG assets and technologies to others in the CG industry. Appointed as the Director is our very own Henrik Folsgaard. Henrik has over 27 years experience in the CG industry. He has worked for such companies as Guerilla Games (all titles at BAFTA Game Awards for best art, design and programming), Mobius VR (CGI for film and VR commissioning), Reallusion, Molto FX and RealD, working with clients such as Peter Jackson at Weta Workshop, James Cameron, DreamWorks and Universal. Henrik is currently COO of the new Studio 300 Image Engine, yet will still be actively working as a freelance, independent CG specialist as well. Henrik has been an active member of the UK based CG community since its early years, and we are looking forward to welcome him and his new studio to Rishikesh. GOALS, OBJECTIVES, SERVICES “We are here to create things that are great”, says Henrik. “We are a new studio, with a lot of technical expertise and ambition, but with a desire for great things, inspired by our deep knowledge of the CG world, and sheer passion for creating and living in it. Our team looks for deep experiences, open spaces, beauty and magic, and also passion for making the impossible possible. We’re pioneers in the CG industry, and we live for the end goal to create great CG experiences that always push the limits of what can be done with CG. We feel that the biggest challenge for all of us is to bring our skills in the CG universe to a place where digital and real meet in a seamless way, so that the divide between the two is closed. One thing I can guarantee is that we aim to create works of excellence”. Today the Studio 300 Image Engine is a production studio focusing on high end CG content and digital creation for artists and businesses, in connection
